- Seabed features (sandbanks, rocks, reefs)
- Maritime boundaries and zones

Among these, symbol 5011 specifically relates to a particular feature or hazard, which will be discussed in detail below.

Understanding Admiralty Chart Symbol 5011

What Does Symbol 5011 Represent?

Admiralty chart symbol 5011 traditionally indicates a wreck or wreck site on nautical charts. It is part of the standard set of symbols used internationally to mark the location of sunken ships, aircraft, or other submerged objects that may pose a hazard to navigation.

Depending on the chart edition and regional adaptations, the visual representation of symbol 5011 may vary slightly, but its core purpose remains consistent: to alert mariners to the presence of a wreck beneath the water surface.

Visual Characteristics of Symbol 5011

Typically, symbol 5011 is depicted as:

- A black or dark-colored icon resembling a ship's hull or a wreck marker.
- Often accompanied by a label or number (e.g., "5011") for easy identification.

- In some charts, it may include additional symbols or annotations to specify the type of wreck or its significance.

The exact shape and size can depend on the chart's scale and the conventions used by the chart publisher.

Context and Usage

This symbol is usually placed directly over the wreck's location, often with an accompanying depth measurement or additional descriptive notes. It serves as a warning for mariners to exercise caution when navigating near the wreck site, especially in conditions of low visibility or strong currents.

Interpreting Symbol 5011 in Practice
